Purpose, objectives and elements of event

Theme-based training was organized for teaching staff for acquiring new EMAB methods and field techniques within WP2. Training on EU and regional legislation in freshwater monitoring was held online.

LIST OF PARTICIPANTS

Ljubica Vasiljević, Svetlana Pelemiš, Jelka Crnobrnja-Isalović, Maja Bobar, Vladimir Randelović

Monday 18, and Thursday 21 January, 2021

Training on Ecological Projects was held by the professor Crnobrnja-Isalović. The training covered following topics Objectives of conservation-ecological projects, Conception of conservation-ecological project, Assessment of conservation status, Organizing and performing monitoring of biological components diversity, Basic concepts of conservation management, Basic principles of conservation and development management. The participants also discussed the syllabus for future course.

CONCLUSIONS

Summary of the Participant feedback from the Online Trainings for ECOBIAS project shows that the meeting was well organized with overall average grade of 3,00.

1.1. Uvod

Osnovni cilj ekoloških projekata je očuvanje ekoloških procesa na različitim nivoima organizacije (jedinka, populacija, vrsta, zajednica, ekosistem).

Razumevanje ekoloških procesa omogućava sprečavanje neodgovarajućih ili štetnih čovekovih intervencija ili, u slučajevima kada su se te intervencije već odigrale, ublažavanje posledica po okruženje.

Negativne antropogene izmene životne sredine počele su da se dešavaju mnogo pre pojave ekologije kao biološke discipline i proizvele su velike gubitke biološke raznovrsnosti.

Međutim, ni dosadašnji napredak u proučavanju i razumevanju ekoloških procesa nije doveo do potpunog ekološkog "osveščivanja" savremenog čoveka.

Ta saznanja su mahom ostajala u okviru dela akademske zajednice i relativno malo napora je ulagano u ekološko prosvetljenje šire društvene zajednice. Ekološki projekti bili su usmereni na usko specijalizovana naučna istraživanja.
